

# Antigen Recovery Procedure

1. Rinse slides in distilled water.
2. Place slides in plastic coplin jar containing retrieval solution.
3. Place coplin jar in pressure cooker and set for 125°C. Cook slides for 3 minutes.
4. When pressure cooker cools to 90°C, release pressure and let stand for 15 minutes.
5. Rinse slides in several changes of distilled water before placing in buffer solution.
6. Slides are ready to be placed on autostainer.
